Hard Skill

- Angular/React
- Typescript/Javascript
- RXJS
- State Management : NGRX
- Git, Github

Tools/IDE's

- Visual Studio Code
- Intelij IDEA
- Postman
- Swagger

Achievements

- **Successfully Placed Android Application Development Workshop** - IIT Powai.
- **Winner of Debugging(C++) event in BlitzKrieg v3.0** – NES Ratnam College, Bhandup
- **Winner of Website Designing event in 'ALCHEMY'** –Ramnrain Ruia College, Mathunga
- **Winner of Website Designing event in 'E-LOGIK'** –Model College, Dombivali
- **2nd in Debugging(C++) event in 'TECHSTORM'** –Mumbai College, Wadala
- **2nd Graphics in C Lang event in 'SPARK IT**' –Guru Nanak Khalasa College, Mathunga

About Me

I'm a motivated, self-thought web developer and experienced working on large-scale team projects. I enjoy collaborating to produce jaw dropping results, while staying vigilant about usability and simplicity.

I stay up-to date and cutting edge on advancements across the developer community. I follow industry experts and takes detailsed notes on best practices to increase value and efficiency of their work benefiting both client and mself

Professional Experience

Tryzens India Pvt Ltd. **-** Tech Lead
May 2023 – Present

Project Name: Priceline (B2C Application)

Project Description:
As the Frontend Tech Lead for the Priceline project, I played a crucial role in leading frontend development efforts within our SAP-based B2C initiatives. Collaborating closely with managers, the SAP Practice Head, and client-facing teams, I ensured seamless communication and alignment with project objectives.

Period: Full fledged development 10 months

Role: Frontend Tech Lead for the Priceline project, specializing in frontend technologies and guiding a team of developers.

Skills:
- Proficient in Angular versions 12 through 15, leveraging advanced features to optimize user experiences.
- Extensive knowledge of SAP technologies and current industry trends.
- Exceptional communication skills enabling effective collaboration with clients and business analysts.
- Strong leadership capabilities demonstrated through mentoring junior developers and conducting comprehensive code reviews.
- Expertise in frontend development technologies including CSS and Bootstrap frameworks.
- Familiarity with mobile-first design principles for creating responsive and engaging UI.
- Experience with SAP Commerce tools like Backoffice and HAC for content/product level configurations.

Education Background

- B. Sc. in Information Technology

  Mumbai University

  2009 - 2012

- HSC

  Vikas College of Arts, Science & Commerce

  Feb - 2009

- SSC

  Powai Marathi Madhyamic School

  Mar - 2007

Certifications

- **Learning Angular 2** – Lynda.com
- **Up and Running with Git and GitHub** – Lynda.com
- **The Web Developer Boot camp** – Online Courses | Udemy.
- **Android Application Developer Certified from** –TALENTEDGE live & interactive digital learning.
- **Building Flexible Android Apps with the Fragments API** – Lynda.com

Hobbies

- I enjoy playing Cricket and Carrom.
- Love watching & following football
- I teach to school & college students.

Key responsibilities:

- Collaborated with stakeholders to gather requirements and define project scope for SAP-based B2C initiatives.
- Prepared estimations for JIRA stories in coordination with the SAP Practice Head and Project Manager, ensuring accurate project planning and resource allocation.
- Provided guidance and training to junior developers and new team members on Spartacus development practices.
- Integrated the Auth0 library for third-party authentication, facilitating seamless integration with external services like Onepass for rewards and offers.
- Implemented customizations on CMS components to streamline content management for UI elements such as Carousels and Banners, enhancing content manager efficiency.
- Led efforts in server-side rendering (SSR) optimization, conducting thorough source code analysis and memory leak identification to prevent fallback to client-side rendering (CSR).
- Collaborated closely with backend developers, QA teams, and other leads to provide technical expertise and ensure project success.
- Conducted training sessions for backend developers on the Spartacus framework to enhance cross-functional collaboration and knowledge sharing.
- Managed the upgrade process from Angular version 12 to version 15, ensuring a smooth transition and compatibility with existing functionalities.

Colgate Palmolive **-** Senior Business Analyst

Dec 2020 – March 2023

Project Name: Hills Retail Order

Project Description:
As a member of the development team for the HRO project, I collaborated with clients and business analysts to gather requirements and define the project scope for SAP-based projects. My primary focus was on leading the development efforts for the SAP-based SPARTACUS library, implementing internationalization and localization features, and creating responsive designs that enhanced user engagement and website performance.

Period: MVP - 3 months, Full fledged development 1 year

Role: My role was as a senior developer and team leader for the HRO project.

Skills:

- Experienced on Angular version 9 / 10 / 11 / 12.
- Strong knowledge of SAP technologies and emerging industry trends.
- Excellent communication skills for collaborating with clients and business analysts.
- Strong leadership skills for mentoring junior developers and conducting code reviews.
- Proficiency in frontend development technologies, including CSS and Bootstrap frameworks.
- Experience with mobile-first design principles.

Key responsibilities:

- Collaborated with clients and business analysts to gather requirements and define project scope for SAP-based projects.
- Led development efforts for SAP-based SPARTACUS library, delivering high-quality frontend UI and functionality that exceeded client expectations.
- Successfully implemented internationalization and localization features on multiple websites, tailoring content and user experiences for different cultures and languages.
- Leveraged mobile-first design principles, utilizing CSS and Bootstrap frameworks to create responsive designs that enhanced user engagement and improved website performance.
- Conducted code reviews and mentored junior developers, helping to ensure code quality, consistency, and adherence to best practices.
- Consistently stayed up-to-date on new SAP technologies and emerging industry trends, proactively sharing knowledge and insights with team members to foster a culture of continuous learning and improvement.

Capgemini - Senior Consultant

Jan 2019 - Dec 2020

Client Name: Translplace

Project Name: Logistics and Transportation desktop software to web app.

Project Description:
As a developer for Capgemini working for the client Transplace, my primary responsibility was to create a website for their food and beverage logistics and transportation management business. I worked closely with the client to understand their requirements, collaborated with business analysts to understand their business model and goals, and implemented various frontend technologies to create a secure and user-friendly website.

Period: 6 months/module
Role: My role was as a senior developer and team leader for the Food and Beverage Logistics & Transportation Management Website project.

Skills:
- Strong knowledge of Angular 6/7/8 and Typescript programming languages.
- Expertise in frontend development technologies such as Redux pattern using NGXS and RXJS libraries, SCSS, and Bootstrap.
- Familiarity with third-party libraries such as lodash, Ag-grid, NGXS, File Saver, etc.
- Experience in designing user experience interface (UI/UX) strategies and converting findings into UI designs.
- Knowledge of form-based authentication using HTML 5, Angular Material, and other related technologies.
- Leadership and mentorship skills for guiding other developers and following best practices in Angular development.

Key responsibilities:

- Communicate with the client to understand the requirement of the website, gained experience in project planning, involved in writing the Project Design Document and Project Plan Document.
- Worked with business analyst to understand their business model and goals.
- Implemented Redux pattern using third party library called NGXS and RXJS.
- Used Third party libraries like lodash, Ag-grid, NGXS, File Saver, etc.
- Involved in creating Component Library called TP-Angular which can used for multiple modules for similar component.
- Involved in designing the user experience interface UI/UX strategy, UI requirements, converting findings into UI designs.
- Worked with SCSS, and Bootstrap.
- Developed and securing the application using form-based authentication using HTML 5, Angular 6/7/8, Typescript, and Angular Material.
- Mentored other programmers in Angular Development for best practices to be followed.

Tata Consultancy Services - IT Analyst

Oct 2016 - Jan 2019

Key responsibilities:
- Communicate with the client to understand the requirement of the website, gained experience in project planning, involved in writing the Project Design Document and Project Plan Document.
- Developed and securing the application using form-based authentication using HTML 5, Angular & CSS.
- Involved in designing the user experience interface UI/UX strategy, UI requirements, converting findings into UI designs.
- Worked with CSS 3, and Bootstrap to create responsive web designs for multiple departments/pages.
- Developed multiple POCs for creating Web Services using MYSQL db.
- Worked on REST APIs for iOS & Android Apps using Node.js, Express.js and MYSQL database.
- Worked on REST API to create services and tested on POSTMAN.
- Worked with business analyst to understand their business model and goals.

Wcities Inc. - Android Developer

Aug 2012 – Oct 2016

Eventseeker App : This project was one the best of our company. The working code was too old so we decided to re-write whole project from the scratch. One of the feature of this app was that it is compatible car platforms like FORD & BOSCH, and this was done using the Applink & bosch SDKs respectively.

Key responsibilities:
- Built online streaming music player with spotify and deezer music service partners.
- Integration of google play services like GCM for cloud notifications and Google maps.
- Use of third party library like volley for network transactions.
- Responsible for designing distinctive screens fortablet optimization and a cleaner layout.
- Designed visually pleasing UI of the feature using Recycler View and Card Views.
- Published same app on Amazon app store with Amazon Maps and push notification using ADM(Amazon device messaging).
- Updated the legacy ant based build system with 'Gradle' Wrote groovy script to address multiple build types, build variants, obfuscation with ProGuard, signing of APK with keystores.
